Christian Endeavor exists to inspire, equip, and encourage local churches to Biblically develop young people as followers of Christ. The Leadership Academy uses interactive teaching methods to reach people with various learning styles. The majority of the materials focus upon Biblical leadership development principles. People in any Christian ministry setting or Christians in the business world will benefit from learning to effectively apply these principles. Along with these insights, participants will invest in a session learning about CE and how this process can transform the way your church develops its young people for Christ.
